

Trade Contracts Management for NetSuite

Streamlining Maritime Management

Step into the future of maritime management with Harbour Mastery's® i-Seaports ERP Management™ solution, a robust native application seamlessly built inside Oracle NetSuite®. This application streamlines maritime operations through digital automation, allowing you to complete tasks more easily, improve effectiveness, and increase operational efficiency.

The **Trade Contracts Management for NetSuite** module, delivers precise, real-time tracking of contract fulfillment details. It manages multi-level rates—whether by quantity, tariff, fixed price, or percentage—streamlining the integration of diverse contract terms into the billing and collection processes.

During the past 15 years, this module has simplified very complex trade agreements and the tracking of their fulfillment to greatly increase accurate revenue generation and billing for both Seaport and clients. – Tampa Port Authority

Benefits

1. Integrates the terms of all types of contracts to the billing and collection processes
2. Provides a real-time view of the contract fulfillment status
3. Stores contract legal documents securely for quick reference
4. Tracks at line item level all contract billable service
5. Controls contract status by any date range
6. Delivers budget-based reports with user-friendly graphical displays

POG has multiple complex agreements with cruise and cargo agents, stevedoring firms, the railroad, security, storage facility managers, warehousing, and pier facilities leases and rentals. These are better managed through i-Seaport's Trade Contracts Management module and custom fields and records linked between agreements and transaction processing workflows.

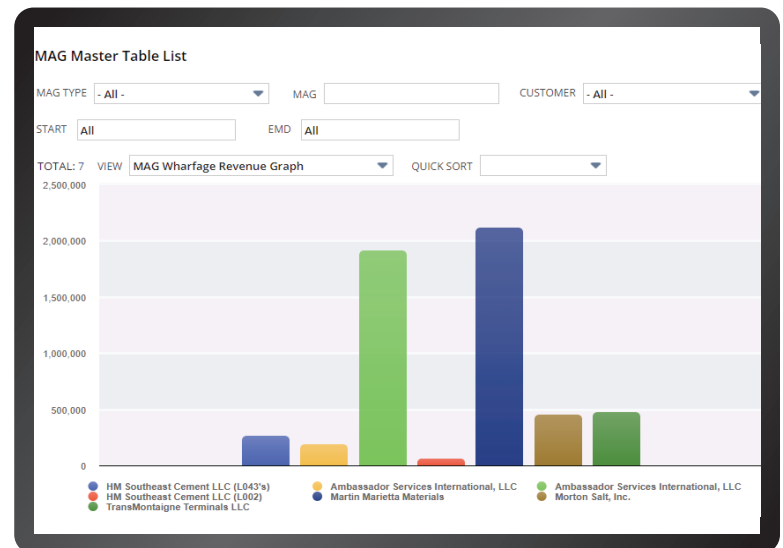

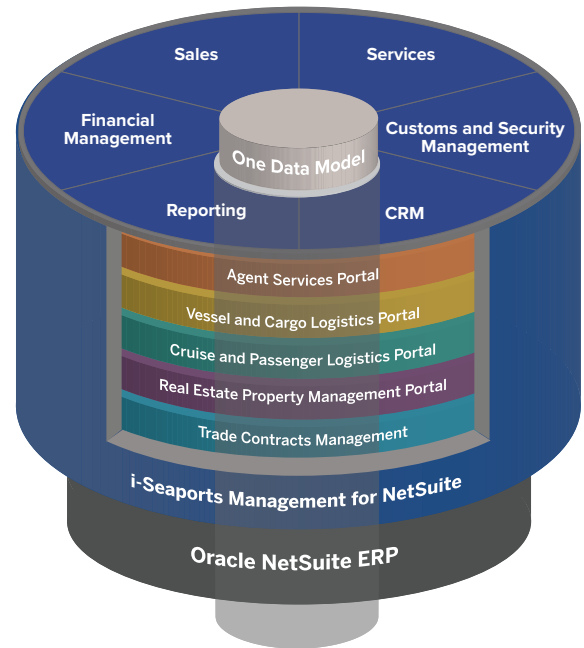

– Port of Galveston

Built Natively inside NetSuite

Trade Contracts Management for NetSuite is 100% natively integrated within NetSuite so that all activity is handled in real-time and with complete 360° visibility. Using this application feels like “you have never left NetSuite” – it’s a seamless experience.

Features

1. Fourteen (14) types of contracts related to real estate, cargo import/export, cruise bundled fees, and other primary types
2. Leases and rentals, vessel calls and dockage, wharfage and throughput, and demurrage and intermodal shipping are standard features
3. Financial tracking of percent of fulfillment, rate caps, and shortfalls to date, provide finance and contract managers a clear picture of any contract as of a date
4. Real-time dashboard alerts warn users and contract holders of any change in status
5. Periodic reporting is visible to clients through the customer portal
6. Global trade reporting is visible on a Google Earth map by country and customer
